

Dear FCC members, I am writing to you about petition 04-160. I own an XM radio, and each month I pay a bill to receive services from the company, many of which I enjoy. These services range from music that I can't hear on AM or FM radio stations to the better quality of sound that the satellite service offers.

When XM radio announced that they were going to have traffic and weather added to their service with no increase in premium, I was over-joyed. I sometimes travel, and when one goes across states, it is hard to find a good station. XM eliminates this problem. It is especially nice to be able to be able to check up on the traffic of a major city before I enter it, so that I might possibly avoid it. I also find it helpful to receive current weather conditions whenever I want. While on the road, I have no other way to check up on the weather other than my XM radio. Please allow XM to keep this service that I pay for monthly.

Thank you,

Justin Burris
